13 Awesome SEO Friendly Content Writing Tips For a Blog Post

Friends, we will give you 13 such tips that you have to follow whenever you write these articles and follow these tips, only then you can write an SEO friendly article and become a pro blogger. Let's know about **SEO Friendly Content Writing 13 Tips**.

1. Collect information

I had already told you that if you want to write an SEO friendly article, then you will have to write good content as well and you can write good content only if you know about it well. If you want to write an article on the topic, then you should be well aware of it, for this, you will have to collect information. To collect information, you will have to read another blog, books. Only then you can give good information and write a good article.

2. Use Best SEO Friendly Themes

If you want to do your website seo well. Then you should use seo friendly lightweight themes. If you run your website on WordPress, then you should use [Newspaper](#) or [generatepress theme](#). Both these themes are very light weight and seo friendly themes. And if you use Google Blogger, then you should take seo friendly blogger templates.

3. Keywords research

For any article SEO friendly, it is necessary to have good keywords in it, only then will your post rank. You have to do keyword research, for this, you can also use the free tool, we have already told about the free keyword research tool which you can use. You have to take keywords with high search volume and flame competition, you do not have to pay attention to CPC. If you pay attention to CPC then you cannot become a good blogger. Your focus should be on putting good content in the article. Use The **Digital SEO Life keyword research free tool**.

5. Word length

When you do good keyword research and collect information, then you will be able to write a good article. *You write a very good article which has 700+ words*, so you have to write it, if you can write more words then it is even better for your article because the longer the article is, the sooner your post will rank.

6. Split Post Into 3 Part

While writing the article, you have to write the article in three parts like in the first part you have to tell the man what information you are going to give in the article. After that, you have to write the information and in

the last, you have to write Outro. You have to do all these three things carefully.

7. Create unique title

The image shows the interface of the 'Blog Title Generator' tool by SEOPressor. At the top center is a lightbulb icon with rays emanating from it. Below the icon, the text 'Blog Title Generator' is displayed in a large, bold font, with 'by SEOPressor' in a smaller font underneath. The background is light gray with faint geometric shapes. Below the title, there is a paragraph of text: 'Get endless suggestion, catchy titles, and other creative blogging topics with our updated Blog Title Generator!'. Underneath this is another line of text: 'Get more relevant results by describing your keyword!'. There are two input fields: a text box on the left with the placeholder text 'Insert your keyword here' and a dropdown menu on the right with the text 'Is a generic term' and a downward arrow. Below these fields is a prominent green button with the text 'Generate Titles' in white.

You have to make a unique title, which should look like it will definitely work for it. And click on it. You must have your main keyword in the unique title. A unique title is 7 to 12 words, do not write more words than this. If you have problems in making unique titles, we have already written an article for this, in which you have been told about some tools, with which you can create a unique title.

8. Search description

To write a good SEO friendly article, you will also have to write a search description. You should have your main keyword in it, only then you can make a good search description, in search description, you have to write about the article, in short, you have to write a search description, targeting your main keyword in 100 to 120 words.

9. Permalink

You have to make the permalink manually. Do not keep the auto permalink before you make the article public, you have to edit the

permalink and see if it has your main keyword or not, then you have to edit it and add it. This is very important for **SEO friendly articles**.

10. Use Copyright Free Image

You don't need to download and use any image from any other blog in any of your articles. You must always use a copyright free image. If you have trouble finding a copyright free image, you can grab the image from the [pixel.com](https://www.pixel.com), and download premium image from the [envato](https://www.envato.com) elements website

11. Image SEO

When you add an image, it is very important to SEO it, this work is very important for this SEO friendly article. If you do not see the image, then your post will take a lot of time to be ranked. For **image SEO**, you must read this article to learn it.

12. Internal linking

Friends, it is very important that you have to do internal linking in your blog if the article you are writing and the other one is getting the name of the topic or it is related to that article, then in any way, you should add a link to that article.

You have to do that by doing this article related to it, there will be help for the visitor to get more information and it will remain on the website or blog.

13. External linking

It is also very important for an **SEO friendly article**, if there is a word in your article or there is a line on which an article can be made and you have not written it, then you add a link to another blog there. This will increase the value of your blog, which will help you in the ranking.

Whatever the link you have given to Dofollow or Nofollow Back Link, the value of your blog is more in the eyes of Google.

Conclusion:

These were some better seo friendly content writing tips, which if you also follow, then your article will also be indexed quickly in the search engine and will rank in the top 10 position fast. The search engine tries to provide good value content to its users. So you should write according to the user in your article and not according to the search engine.
